C. J. BRAREN

Quality Bread

There is a peculiar something about Barber's Bread that makes it stand out prominently in many homes in this town—it has a tastiness that causes the children and grown ups to marvel at its goodness. The answer is, Quality, and that is because the best wheats and other ingredients of the highest nutrition, combined with modern methods of baking go into every loaf. We serve quite a number of the citizens daily, and we can serve you too. Buy a loaf of our bread today and you will appreciate this. Our cakes and pastries are equally good, and prices are reasonable.

"Bullet Proof"

"IT'S A UNIVERSAL PICTURE"

CLARESHOLM LOCAL NEWS

E. L. Irwin has moved to Wainwright.

W. Ross is moving to Pentton, B. C., this week.

Clareholm will play baseball in a tournament at Granum next Wednesday afternoon.

Mrs. Buckingham and daughter left on Tuesday to join Mr. Buckingham at the farm at Empress.

Mrs. D. B. Vanhorn and daughter went to Banff on Monday for a two weeks' holiday outing.

Geo. McMillan was judge of cattle at the fair here last week. While in town he called on old friends.

Delbert Reynolds' father and mother, also his sister, of Neepawa, Manitoba, are here for a visit with him.

Rev. Locke and Mrs. Locke returned on Friday night last from spending their holidays at Gull Lake and Banff.

There will be a meeting of the referendum committee in the Methodist church on Sunday evening at the close of the service.

Constable Vise of the Alberta Provincial Police has been transferred to Medicine Hat. He and his family left this week for the Hat.

Arrangements are under way for the dry plebiscite. Returning officers have been appointed for the vote to be taken on October 25. Sam Heap, of Macleod, is the returning officer for this district.

The fair last Thursday and was very good. In the departments of grains, vegetables, and cookery the display this year was pronounced by competent judges to be the best we have ever had at this fair. A good program of races was given on Friday afternoon. The band music held out the afternoon's entertainment and was much appreciated.

Present indications are that the second visitation of the beet worms will be here before the middle of August instead of in September as the bugologists predicted, and unless all signs fail the second visitation will be very much worse than the first. The moths are here now in millions, which means that the worms will very soon be here in billions.

For years Pierre and McGuirk had sought each other—each with murder in his heart. Each bore a charmed life, and each instinctively knew that his end would come at the hands of the other. Their final meeting provides one of the unexpected climaxes in Harry Carey's latest feature, "Bullet Proof," at the Rex Theater next Friday and Saturday.

We have heard it said that it is unlucky to go under a ladder, and also that Friday is a more or less unlucky day. Mrs. Boese has had confirmation that the combination at least has its drawbacks. Last Friday a heavy ladder leaning against the building fell on her cutting her face badly and badly bruising her shoulders. She was stunned by the blow but luckily escaped permanent injury. It was an accident that might easily have resulted much more seriously.

Church of the Nazarene

A special Gospel Campaign will be held by the river, six miles west of town, in the interest of the Kingdom of Christ. We extend a hearty invitation to all interested in their own spiritual welfare as well as their fellow men. We are looking for the good people of Clareholm to co-operate with us when they can do so without neglecting their own pastor and work. Come, and allow the spirit of this campaign to be thoroughly inter-denominational, and we are sure that God will reward. Rev. A. C. Metcalf, of Red Deer, Alta., will be our Evangelist. Do not miss hearing a man profoundly spiritual and capable. Campaign commences August 6th and closes with Sunday August the 15th. All our services in the town will be lifted for these ten days. Rev. R. S. Tenove, Pastor.

ULTIMATUM TO RUSSIA

London, Aug. 5.—According to the Herald, Premier Lloyd George, during his conversation with M. Krasin and Kameneff yesterday, presented an ultimatum to the Bolshevik representatives, demanding an immediate and unconditional cessation of the Russian advance into Poland, or otherwise great Britain would declare war.

The Daily Mail says the note "says plainly that Poland is being overrun, and if, instead of hastening an armistice, the Bolshevik armies continue to advance, the situation foreseen in the note of July 20 will have arisen, and Great Britain and her allies will be obliged to assist in the support of the Poles."

Aviator Locklear Killed

Los Angeles, Aug. 3.—Lieut. Locklear, famous "stunt" aviator and Lieut. Elliott, his aide, were killed tonight when their plane crashed to the earth from a distance of 1,000 feet. Locklear, who had gained the sobriquet "dare-devil" because of his many thrilling stunts in the air, was engaged with Lieut. Elliott in performing a feat for a moving picture concern. When 1,000 feet high he was given a signal by the motion picture director and started into a nose dive. A battery of search lights was playing on them and machine and firework were being set off from the plane by Lieut. Elliott. When he had dropped to within 20 feet of the earth Locklear was seen to attempt to straighten his plane out. He was too low, however, and crashed to the earth.

As a result of the general provincial election held in Nova Scotia last week, the Liberal government which has been continuously in power for the past thirty-eight years, and headed by George H. Murray since 1896, was returned with a majority of seven members in a house of forty-three members. The Conservatives returned 1; Labor 5; and Farmers 7.

Footills Lodge No. 13

I. O. O. F.

Meets every Monday evening at 8 o'clock in Odd Fellows' Hall

Visiting Brethren Welcome

E. G. BARBER, N. G.

D. R. MACGREGOR, V. G.

GEO. RINGROSE, R. S.

G. W. V. A.

The Clareholm Branch of the Great War Veterans' Association held regular meetings on the second Wednesday and fourth Saturday of each month. Our rooms are open to all comrades from 2 until 11 p.m. daily. Visiting Comrades always welcome. T. A. Murray, Pres.

ROYAL YEAST CAKES

Royal Yeast has been the standard yeast in Canada for over 50 years, and it is a well known fact that bread made with Royal Yeast possesses a greater amount of nourishment than that made with any other.

Co-Operation in Industry

Although sharp differences of opinion may exist throughout Canada as to the methods to be employed to promote the prosperity and development of industry in this Dominion, people are a unit in desiring to see the natural resources of this country developed to their fullest extent for the use and benefit of our own people and in order to enlarge the export trade of Canada.

No thinking man or woman is antagonistic to the building up of great manufacturing industries in Canada; on the contrary, everybody welcomes them, is anxious to see them prosper, and is prepared to do everything within reason to assist their growth in the common interests of all and for the welfare of the Dominion. Opinions may and do differ as to the policies and methods to be adopted to that end, and there are properly open to debate, but it is almost universally recognized and accepted that the primary means to be employed should be vigorous and vigorous development of Canada's latent wealth in natural resources of all kinds.

Manufacturers, workmen and consumers alike stand to benefit greatly through the development for use of those natural sources of wealth with which the several provinces abound. For example, it is a source of national strength and of benefit to all people that, as one proponent of the great manufacturing interests recently pointed out, Canada should have a great match-making industry. Such an industry calls for the creation of many natural products of Canada, gives employment to hundreds of men and women, and to the extent that it supplies the home market and adds to the export trade of Canada, adds to the national strength and financial stability of the country. Our people should welcome and support such industries.

But it is in the interests of all manufacturing industries as well as in the interests of transportation, business generally, and the whole body of the consuming public that the basic industries should be given first and foremost attention, such an industry, for example, as coal mining. Without adequate supply of coal, reasonable prices at manufacturing industry, transportation, and so forth, would be seriously crippled, if, indeed, not brought to a standstill. Canada has abundant coal deposits, yet this country has for generations imported coal to the extent of tens of millions of tons annually, this adding to the adverse balance of trade, while our own mines have languished and employment in the coal industry has been denied to our people. Now, owing to conditions over which this country has no control, it has become a matter of dire necessity that our people should secure their coal requirements largely at home. Here in the West we must rely almost exclusively this fall and winter upon the output of our western mines, yet because the lack of development in the past it will be difficult for them to meet the heavy demands so suddenly thrust upon them.

In past years these mines have frequently been idle during the summer

months, because there was no immediate demand for coal, and because much of it is of a class that cannot be stored in the open, subject to the weather conditions. It must be stored under cover. This has resulted in labor dissatisfaction, because of "lay-offs" at the mines, and the operators have had great difficulty in maintaining full and efficient staffs of workers. Such a condition has also added to the transportation problem, inasmuch as the railroad coal movement from the Alberta mines to Saskatchewan and Manitoba has come at the same period of the year as the heavy movement of grain from the prairies to the head of the lakes. In other words the two heaviest freight movements have come together, and both have called for transportation in the same direction—from east to west. If one moved west and the other east, the transportation problem would be simple, but two heavy freight movements in one direction, means a return of long trains of empty cars the other way, thus adding enormously to transportation costs which the people have to pay.

Future provision must be made for the transportation and storage of Western coal during the summer months before the grain movement begins in the fall if dangers of grain blockades or an acute coal shortage in severe weather are to be avoided. It is too late to do much in this direction this year, but the people can help very materially in a simple and thoroughly practical manner by buying their winter's requirements of coal and taking delivery of it into their cellars, which are the chief existing places of storage—now. A heavy movement of coal in the West during the next six or eight weeks will assist enormously in reducing the costs, preventing grain blockades with a longer crop in prospect, and will be a help against a coal shortage with its resultant inconvenience and suffering, and largely solve the big transportation problem which the provinces will cripple this country during the coming fall and winter.

To Hold Court at Chesterfield Inlet

For the first time in Canadian history, court will be held at Chesterfield Inlet, when Oungwawik, alleged bloodsucker or an acute coal shortage in severe weather are to be avoided. It is too late to do much in this direction this year, but the people can help very materially in a simple and thoroughly practical manner by buying their winter's requirements of coal and taking delivery of it into their cellars, which are the chief existing places of storage—now. A heavy movement of coal in the West during the next six or eight weeks will assist enormously in reducing the costs, preventing grain blockades with a longer crop in prospect, and will be a help against a coal shortage with its resultant inconvenience and suffering, and largely solve the big transportation problem which the provinces will cripple this country during the coming fall and winter.

SAVE THE CHILDREN

Mothers who keep a box of Baby's Own Tablets in the house may feel reasonably safe during the hot weather. Stomach troubles, cholera infantum, and other ailments of the thousands of little ones every summer, in most cases because the mother does not have a medicine at hand to give promptly. Baby's Own Tablets will relieve these troubles, or if given occasionally to the well child will prevent them. The Tablets are guaranteed by a government analyst to be absolutely harmless and safe for children. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail order from The Dr. Williams' Medicine Co., Brockville, Ont.

Frenchman Inventor Of Poison Gas

Proof Sought in Original Documents Dated April 1865
That a Swiss lieutenant 220 years ago invented asphyxiating gas for the French army, is the claim advanced by the French press supported by historic documents, proving that so far as we are concerned there really is nothing new under the sun. The Ministry of Foreign Affairs contains the original documents dated April 1865, signed by Duple, French Consul at Geneva, attributing the discovery to the Sieur Dorach of the King at the Canton of Fribourg. According to Dorach's claims, he was able in four hours at a minimum expense to prepare a liquid giving off a gas so thick and of such disagreeable odor that it was impossible for human beings to remain in its proximity.

The gas bomb is a new invention, for Dorach had perfected a method of throwing containers from a cannon, even exceeding modern gas art by devising a cartridge or tube to be fired from an ordinary army rifle. The official records, however, fail to show whether the great Louis investigated Dorach's discovery, but military experts of today point out that the letters were mentioned 19 years ago in a volume published by the Swiss Consul in Belgium and probably originating German sources of frightfulness to investigate the possibilities of adopting gas in warfare.

Birds That Cannot Fly

Wings of Barnyard Fowls Have become Useless for Flying
Why don't barnyard fowls fly? They can make a fluttering effort at flight, it is true, but for real flying their wings are useless. Barnyard fowls have lost the use of their wings through neglecting to use them. They have been valued for their eggs, and as a consequence, they have been well fed. Thus the necessity for flying from place to place in search of food has not existed. They have the same reason been protected as far as possible from attack by animals and from other dangers that would make flight, as a means of escape, a necessity. In course of time, therefore, their wings have become practically useless for purposes of flight. The wings of barnyard fowls are gradually decreasing in size. It may be in the course of time their wings will be nothing more than mere stumps, and later still it is quite possible that they will disappear altogether.

IT CURES CATARRH BRONCHITIS

You don't have to wait for relief when you use Catarrh-ene. This wonderful liniment is guaranteed to cure any case of Catarrh, whether chronic. You breathe through this inhaler and in so doing you get all the Catarrh-ene into your lungs, soothing and healing, germ-killing, and relieving. In this way the seeds of Catarrh are destroyed. Sores, wheezing, coughing, hard breathing, and sneezing stop. For lasting relief, use Catarrh-ene. A 25¢ bottle, 50¢ bottle, 10¢ bottle. Catarrh-ene is sold everywhere. You can get it at any drug store, or by mail from the Catarrh-ene Co., Kingston, Ont., Canada.

Canada's Need

Resources Only Need to be Developed in Order to Enrich This Country

What is the need of Canada at the present time? The answer is, we are in debt in this country. How are we going to meet it? We are told to produce. We can produce in the factories on the land, and in the mines of this country. We have great natural resources that only need to be developed in order to enrich this country; and if we can only develop those resources to the extent of one-fourth of their value at the present time we would have no trouble in meeting our obligations as a nation. There is no cause for any person in this country to be discouraged about the future of Canada. All we need to do is to move around this Dominion to realize the great resources we possess; and we cannot help but be come proud of our country and cannot help but glory in the fact that, in Canada, we have as great wealth and as great opportunities as are to be found in any land in the world today. What is requisite is to encourage the development of those resources, and give an opportunity to the people to take advantage of the wealth that is in the country there will be no need for the government to worry about the future of Canada and no need for the honest, capable and ambitious citizen of Canada to be discouraged either.—W. A. Buchanan, M.P., in the House of Commons.

The Danube River flows through countries in which 52 languages and dialects are spoken.

Cause of Asthma. No one can say with certainty exactly what causes the malady of asthmatic conditions. Dust from the street, from flowers, from grain and various other things may set up a trouble impossible to eradicate except through a pure preparation such as Dr. D. K. Kelly's Asthma Remedy. Uncertainty may be a perfect pest. Now, we can be so uncertainly regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

Rain falls in torrents in the Sahara Desert at intervals of five, ten and twenty years.

Minard's Liniment Relieves Garget in Cows.

Open Timber Exhibition

Canada Has Attractive Display At Kensington
Prince Arthur of Connaught, opened the Empire Timber Exhibition at Kensington, promoted by the governmental department of agriculture, with the object of bringing into more universal use the timber grown in the Empire. The promoters give a special word of praise to the Canadian forestry laboratories at Montreal. Canada has a fairly extensive, and well staged exhibit, and a few Canadian firms have individual displays. The exhibition is of a purely technical character, intended to attract traders. The official catalogue which contains a list of shippers, importers, etc., will doubtless prove useful to specialists in the timber industry.

Farmers and Automobiles
Practically 50 percent of all the motorcars built are sold to farmers. The sales of motor trucks to farmers are fast reaching that high mark, for the trucks afford the means to save money, not only in transporting farm products to market and getting better prices, but in cutting down the farmer's overhead expenses.

Minard's Liniment Relieves Distemper.

Pershing Receives Jewelled Sword

Sir Auckland Geddes Presents Gift From City of London
Great Britain does not forget those who prove themselves its friends in the hour of need. Sir Auckland Geddes, British ambassador to the United States, told C. Pershing, in presenting him with a jewelled sword as a gift from the City of London. The presentation was made at the British embassy.

Commenting on the celebration of the independence of the United States "wring from an autocratic government by the spirit of individual freedom in many lands," Sir Auckland Geddes recalled that in those days, "there were many on both sides of the Atlantic Ocean who thought the action of the framers of our constitution right."

"There is none now, I believe, on either side of the Atlantic," he said, "who does not wish that they were right. Though neither you nor we are all of English stock, the memories of Runnymede are a possession of all your people as they are living memory and possession of all the British people."

General Pershing accepted the sword "in the name of the men of the United States who, with the men of Great Britain, and the soldiers of a combined the courage and skill that brought a new victory to our race, and to all those who seek justice and liberty for mankind."

ARCHIE E. LAUNDY.

Sumatra Protects Tigers
Tigers are protected in Sumatra, the reason being that one of the important industries of that country is the cultivation of an African palm. This palm was introduced several years ago, and the wild hogs so enjoyed its easily obtained fruits and so thrived on them that they increased and multiplied rapidly until they became a perfect pest. Now, wild hogs are the favorite diet of Sumatran tigers, therefore the protection for tigers looks like a dangerous experiment.

England to Grow Square Trees
Not with any desire of giving publicity to the designs of that curious class of artists, called cubists, but with the entire laudatory ambition of avoiding waste, the Cambridge Forestry Association, of Cambridge, England, suggests that trees should be made to grow square instead of round, thus producing wood of better quality and in greater quantity. Will the leaves, flowers and fruit of such trees be square also, one wonders?

Holland is covered with willow trees, and the great dykes which the country are made stronger by the network formed by the roots.

When the weather is fine and the sea calm, seals frequently seal floating upon their backs in the water.

Partridge Tires
Game as Their Name

Extravagant claims and exaggerated statements may sell tires—but they can never make tires give mileage or service.

About Partridge Tires little need be said. Their reputation for durability and dependability under all road conditions, justifies the statement: "You can't buy better tires."

Can Earn Big Money

Selling Men's Made-to-Measure Clothes in his local territory. Style, quality and value of garments made from Ocean to Ocean. Address—in first instance—with full information to P. O. Box 105, Montreal.

Swat the Rooster

Much Loss Is Incurred in Summer Months Through Placing Fertile Eggs on the Market

The presence of male birds in the flock during the summer months has a decidedly detrimental effect upon the quality of eggs and poultry producers lose many thousands of dollars annually through the presence of partially incubated and had eggs in the produce they market. Reports are now being received from all parts of the country of the number of partially incubated eggs appearing in current receipts. Producers do not realize that it is unnecessary for a fertile egg to be placed under a broody hen to cause the germ to grow. A temperature of seventy degrees is sufficient to start incubation. If the heat is constant the germ will develop, the chick will continue, but if it ceases or is intermittent, putrefaction at once sets in, and the egg becomes bad. Such eggs have no place or value in shipments, and should they get to the consumer the consumptive demand for such eggs is lower than the price that prevailed in the spring has to be accepted, the producer thus losing the amount per pound of the loss. He has declined, plus the value of the feed consumed by the birds during the summer months. This financial loss takes on a more serious aspect when it is coupled with the amount charged back by the wholesaler for the bad and partially incubated eggs that have been marketed.

Farmers and other selling eggs for market should therefore need no urging to kill off, dispose of, or at least remove the male birds from the flock after the breeding season.

Hard and soft corns both yield to Holloway's Corn Cure, which is entirely safe to use, and certain and satisfactory in its action.

Two thousand dollars a year and a house is the minimum salary suggested for clergymen in England.

Good Judgment leads thousands of housewives to serve Grape-Nuts

in place of foods that require hours of drudgery in a hot kitchen. Needs No Sugar Comes ready to eat from the package.

"There's a Reason" for Grape-Nuts

Spring Wheat Crop Is a Big Factor in Prosperity of Dominion

Europe's bread supply this coming season will depend, in a large measure, upon the spring wheat crop of the United States and Canada. Also, the purchasing power of Canada, one of our very best customers, will be measured by the crop which are its main source of wealth, says the Wall Street Journal. It must be reassuring, therefore, to wheat importing companies and the business interests of the United States to see every evidence of good crops in Canada.

It is difficult to estimate a spring wheat crop at this date. But at least it is certain that prospects are far more favorable than usual at this time of the year. Soil and weather conditions equal those of 1915, when Canada produced a mammoth crop. Compared with last year the acreage is reduced, but the 16,000,000 acres are sufficient for a large production with good weather.

In the past ten years the Canadian yield has averaged 72.7 bush. per acre. There have been years when the yield was far in excess of this. Soil conditions now favorable for food, the average production, but even 1727 bushels per acre would mean a crop

All Canadian Highway

Efforts of Highway Association Are Bringing Results

Smooth sailing from Winnipeg to Vancouver, and the entire distance "good roads paved," will soon be a reality as a result of the efforts of the Canadian Colonization and Highway Association.

The construction of a road between Kenora and the Manitoba boundary was an assumed task of the Canadian Colonization and Highway Association. Engineers have already received instructions to make the preliminary survey and to arrange for a meeting point on the Manitoba boundary with the Manitoba engineers.

The strong delegation of the officials of the Highway Association, mayors of the towns and cities en route, and other interested residents of the western cities of the province, waited on the Ontario government to the construction of a road to connect the two cities of Port Arthur and Fort William, were assured by Premier Drury that the matter would receive the careful and immediate attention of the Ontario government, and that at least the portion of the highway between Kenora and the Manitoba boundary would be completed immediately, and that the remainder would be considered after receiving a report from the engineers.

Under the auspices of the Canadian Colonization and Highway Association, the survey of the country which would be traversed by the proposed highway.

For many years past this road has been discussed by those interested in the building of an all-Canadian highway. The Canadian Colonization and Highway Association, and the Kenora section has been strongly backed by James Wyndham, editor of the Kenora Examiner, who is an old resident of this district; but it was not until the Central Canada Colonization and Highway Association came into existence at Dryden in November, 1910, under the presidency of Alfred Pitt, Dryden, that any definite program was set on foot. Since that time, and bringing about a realization of the aims of those interested in the project.

The route between Winnipeg and Port William is an important link in the all-Canadian highway, and the prospect of the immediate construction of the Winnipeg-Kenora section will give a great impetus to the movement of Dominion control of this important highway.

It is an absolute necessity, the new point of an absolute necessity, the highway across Canada should be built, and it is in the interest of the Dominion.

Blame Rents With Ireland

England Disgraced of According the Full Measure of Freedom

Fury articles devoted to the relations between Great Britain and the United States, and especially the "chief edition" of the London Times, which are the most powerful of the modern press, have been published in the United States. The articles are up and down. Canada now rejoices in a university which is its steel corporation, the largest steel corporation in the world. The articles also are up and down. Canada now rejoices in a university which is its steel corporation, the largest steel corporation in the world. The articles also are up and down. Canada now rejoices in a university which is its steel corporation, the largest steel corporation in the world.

Publications for Farmers

New List of Publications of the Department of Agriculture

The new list of publications of the Department of Agriculture, which contains titles of nearly three hundred and fifty bulletins, circulars and other pamphlets that deal with agricultural practices, and other titles, is available from the Publications Branch of the Department. But any of the publications therein contained.

In old times rhinoceros horns were employed for drinking cups by royal personages, the notion being that poison put into them would show itself by bubbling.

From Coast to Coast in Canada

Members of National Editorial Association of America To Visit Canada

This has been the privilege of the members of the National Editorial Association of the United States, the largest organization of its kind in the world, with a membership of over 11,000.

During the past few weeks, two hundred members of the association have been touring Eastern Canada. Less than a year ago, members of the association toured western Canada, saw its vast rolling prairies, its magnificent mountains and its Pacific shores. It is the first association of newspaper people of America to visit Canada from coast to coast in such an advantageous way. Now to our American friends, the very name of the association of the first, untrammeled outdoors, and conjures up with sweet visions of scented valleys bathed in sunlight, of white-crowned birds breaking on silver strands of cool and shadowy forest lakes, haunted with memories of the red man and his hunt, of smoky farm lands and laughing lakes and mountains.

During the month of June, the newspaper representatives from 14 states in the Union, visited the land of Evangeline, Halifax, the mines and steel works at Sydney, the Massey's of Lake in Cape Breton, the industrial centres of New Glasgow and Antigonish, Truro, Amherst, Sackville, and Prince Edward Island (the nation's dairy farm), historic Quebec and St. Anne de Beaupre, the big power plants of the St. Lawrence, and the Shewanigan, Ottawa, the gold and silver camps at Porcupine, the pulp and paper industries at Trois Rivières, Toronto, Niagara Falls, Hamilton, and as a wind-up the trip to Windsor. Altogether some 3,600 miles will have been covered, and the members of the "Million-Dollar Special" of the first all-Canadian train that has ever been assembled on this continent will have seen many of the best sleeping cars, two dining cars, tourist and baggage cars. The new steel bridge of the St. Lawrence, and the construction, with all modern conveniences, of the new hotel and the excellence of the cuisine has been frequently commented on by the members of the association.

The Canadian producer cannot too closely study the returns of British imports. What is true of Britain is true of Canada. The same and last. The Country imports, since the third year of war, especially, have come more and more from outside of the Atlantic.

With Mr. H. H. Melanson, the passenger traffic manager, made the "preparation" tour of the province.

Altogether, the tour has been of exceptional educational value and it should be one more step in fostering the spirit of unity between the two adjoining countries where peace has reigned for the last 200 years.

Stock Growers Meet

Expected That Widened Scope Will Result in Increased Membership

With but a few points left open for final decision at the next annual meeting, the Stock Growers' Federation of Western Canada have agreed upon the draft constitution submitted by R. B. Bunn, K. C. With definite lines of action now laid down, it is anticipated that increased useful work will be undertaken by the association during the coming year.

The two or three points that have been left in abeyance include the question of whether the association should be interested in raising producers, and whether profits will be allowed when a vote on questions of policy are taken.

It is expected that there will be a largely increased membership in the Association owing to its widened scope, and the fact that the bond has been reduced from \$5,000 to \$500.

It was decided that the next general meeting of the association will be held at the annual bull sale in Regina in 1921.

B.C. and the Apple Market

Heavy Shipments Will Be Made to Great Britain

This year Apple shipments from the Okanagan Valley, of British Columbia to Great Britain during the past season amounted to 420 carloads, as compared with only 85 in the best previous year. Inquiries indicate that the market for apples from British Columbia will be greatly increased this season.

World Shortage of Meat Supplies is Opportunity for Farmer

The vital relationship between the production of live-stock and the marketing of the meat is evident to every farmer. But farmers do not know so well on what factors meat packers base their activities for future trade. Packers study keenly the tendency of the markets for the product of both. They regulate their year-to-year policy largely on the prospects for live-stock production, but their general policy spread over a term of years, is more largely controlled by a judgment of market prospects.

Canadian packers, realizing the interdependence of production and marketing, believe that if Canadian farmers are well informed about the markets they will maintain live-stock production in sufficient volume to feed those markets.

A remarkable change unquestionably took place between 1914 and 1919 in the geographic source of the British supplies of meat and other products. Whereas before the war the Old World group of countries furnished three-fifths of the meat shipped into Britain, the trade had by 1919 turned almost wholly to the New World. Over nineteen-twentieths of the meat from the United States and Canada.

This is due to causes which were well known and appreciated during the war. But what is not quite so generally understood is that tendencies in trade, begun then, have become more pronounced since. It is possible that they may be permanent. The state of Russia, after the social upheaval has been mentioned. In the past the effect of costly feed and the reduction in number of live-stock in Denmark and the Netherlands will last many years, and the possibilities are, that they must draw a greater part of their feed stuff from this side of the Atlantic.

Yet neither importation difficulties nor industrial evolution can for the next ten years alter simple facts of a world scarcity in meat supplies.

Bee-Keeping in Central Alberta

Honey Going to Waste For Want of Bees to Gather It

Bees can only be raised successfully in Alberta, but the amount of honey that they make and the quality of the honey is not as good as other places on the continent. J. Q. Adams, of Hobbins, in Central Alberta, who has been raising bees successfully there for sixteen years, has been the blossoming of the bee industry are very encouraging, especially at the present time, considering the high price of sweets. From his experience he has found that the bees can be raised successfully in Alberta, either in the country or in the city, and there is no reason why more people do not go far beyond the thousands of pounds of honey are going to waste every year for want of bees to gather it.

Stock Growers Meet

Expected That Widened Scope Will Result in Increased Membership

With but a few points left open for final decision at the next annual meeting, the Stock Growers' Federation of Western Canada have agreed upon the draft constitution submitted by R. B. Bunn, K. C. With definite lines of action now laid down, it is anticipated that increased useful work will be undertaken by the association during the coming year.

The two or three points that have been left in abeyance include the question of whether the association should be interested in raising producers, and whether profits will be allowed when a vote on questions of policy are taken.

It is expected that there will be a largely increased membership in the Association owing to its widened scope, and the fact that the bond has been reduced from \$5,000 to \$500.

It was decided that the next general meeting of the association will be held at the annual bull sale in Regina in 1921.

B.C. and the Apple Market

Heavy Shipments Will Be Made to Great Britain

This year Apple shipments from the Okanagan Valley, of British Columbia to Great Britain during the past season amounted to 420 carloads, as compared with only 85 in the best previous year. Inquiries indicate that the market for apples from British Columbia will be greatly increased this season.

Careers for Boys

A Boy Should Discover Himself Before He Begins to Drift

A letter in a newspaper lately issued by a schoolboy complaining that boys at school are never given any information about the various lines of life are open to them, and therefore, on leaving school are liable to drift into third-rate situations.

As the writer puts it: while very young boys are not to be drivers or pirates. As they grow old they are to be aught at this, but have no other idea of what they are really going to take up. Nobody even suggests to them a career, and many of them merely follow the lead of one of their number who happens to strike out a particular path. I know it is not in the case of sons. In a paternal system, if one boy is successful, the others are to be a witness to a wireless operator or a detective, all they want to be the same, whether they have any natural gift in that direction or not.

The boy-writer I have referred to says:

"The average boy only knows of the common professions, such as soldier, sailor, doctor, schoolmaster and clergyman. But I have heard of two professions that I never knew existed. One boy told me that he was going to be a pilot on the Indian river service, it was a very well paid, and is certainly very little known. Another boy was told that engineering was a good profession, the great trades of the world during the next ten years or so, and that to succeed at it you had to learn all about it as well as to have a special form of chemistry. Now paper making is not the sort of profession that boys would be likely to choose merely because he has never had a chance of realizing that it is a profession that any boy goes to. It is a profession that is over the world. The existence of all these professions ought to be made clear to boys at schools when they are young and have plenty of time to decide, so that they may be sure what to do when the time comes. It is especially true of the boys that a number of new professions are coming into existence."

That is the way that every boy should think. It is an error that Scoutmasters should not miss. They can well collect particulars of the many professions that are open to young men, and let the boys decide for themselves, and not merely for the monetary advantages offered. Yes, it is contrary to the usual practice that the Scoutmaster should try to introduce the boys to careers instead of existence.

Customers Paid for It

A small storekeeper put up in his mind not long ago an "elaborate new blind. Quoth his neighbor: "What of yours, Isaac?" "Yes," he replied. "What paid for it, Isaac?" "The customers paid for it," Isaac replied. "Yes, I put a little box on my counter and labeled it, 'For the Blind,' and they paid for it."

From the source to the study of the Rhine, there are to be found nearly 800 castles.

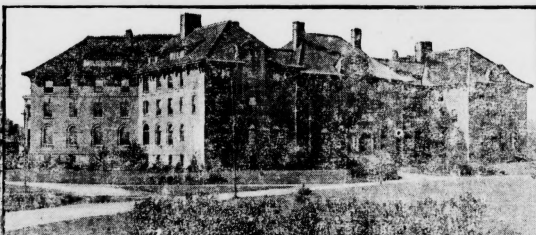

Horse racing in Great Britain gives employment to 25,000 people.

AUCTION SALE

Having received instructions from H. COHEN, owner, I will sell at Public Auction at the
C. P. R. Stock Yards, NANTON, on

AT 2 O'CLOCK P. M.
250 HEAD OF CATTLE
 consisting of 200 head of one and two year old steers and 50 head of cows and heifers.

Terms Cash. No Reserve. **G. H. LEGLER, Auctioneer**

Education in Canada

Under the British North America Act of 1867, the right to legislate on matters respecting education in Canada was reserved exclusively to the provincial legislatures. In general throughout Canada there are two fundamental systems of education, one that of the Protestant communities free from the control of religious bodies and the other that of Roman Catholic communities in which education is united with the religious teaching of the church. In all the provinces the cost of education is defrayed from the public revenue, provincial or local, and public and elementary education is absolutely free. With the exception of Quebec all the provinces have laws of compulsory school attendance, uniformity in the training of teachers, text books and the salary of children. Upon application the provincial government give immediate financial assistance for the erection of new schools where attendance demands a large outlay. Each year thousands of new schools are built throughout the length of the country especially in the ever growing western provinces. Assistance in the payment of teachers is given by a system of grants. Nature study, manual instruction, school gardens, domestic science and technical education have been taken up energetically, wait agriculture, which after all is the country's prime interest forms an important item in the curriculum of all schools.

In the cities and towns of the Dominion no expense is spared in the erection of handsome, purpose-built school buildings, where health and discipline are the prime consideration and they form no mean part of the aggregate of Canada's fine public structures. Solicitude is carried to the health and the general welfare of the pupils in the plan of construction, and medical officers and health nurses supervise the general well-being when they are in operation.

In the rural districts naturally where in the first settlement farms are often widely scattered, educational facilities do not exist in the same perfection, though every thing is done by the education authorities to meet the more difficult conditions and the child of the farmer need not fall far behind his city brother in the progress of learning.

The majority of the schools are ungraded, that is several small classes are taught by the one instructor, and the districts are of such dimensions as to make the school so nearly accessible from the furthest farms. Fully trained local normal schools, attendance is compulsory as in the city.

(1) Macdonald College, Ste. Anne de Bellevue, P.Q., where many Canadian teachers are trained.
 (2) At the Agricultural College, Olds, Alta.
 (3) A Group of Pupils at a Rural School in Western Canada.

Every province possesses finely equipped agricultural colleges with up-to-date facilities of scientific farming, experts where the most progressive and modern methods of agriculture are taught and where the degree of Bachelor of Science in Agriculture is conferred at graduation. As it is impossible for many of the sons and daughters of farmers to attend all the year round and complete the course, winter sessions are held in every province where short courses are given imparting thorough training in both agriculture and the public school system. In intelligent farming and scientific methods, domestic science and other phases of farm work. These courses have a proved of immense interest and value and are widely appreciated by agricultural communities whilst the attendance is yearly increased as the benefits to be derived from short courses are more fully realized.

Lovely Regions in the Canadian Rockies

If the beauty of the Canadian Rocky Mountains, north of the line between the Dominion and the United States, is not the grandest in the world it is certainly lovely as anywhere, and it is the loveliest in the American continent. The glory of the European Alps is dimmed by the towering snow clad peaks of the Rockies. Travelers on the Canadian Pacific Railway from Calgary, through Banff, Lake Louise, Field and Glacier on to the Pacific Coast view a land in which they feel themselves transferred to an earthly paradise.

The gigantic heights, the snow capped peaks, the rugged boulders, the pines growing in the sand and rock crevices up as far as the snow line are amongst the most impressive features of the Rocky Mountains. Here the builders of the C.P.R. ever were able to excavate their way through this region is one of the wonders of the world.

Visitors, whose time is limited should anyway explore a portion of the Rocky Mountain region and stay off at Banff and Lake Louise, points where the C.P.R. has built luxurious hotels. Besides, good roads radiate from these spots and automobiles of police can be chartered to bring the tourist right into the heart of the most scenic region.

Banff is situated at an altitude of 4,500 feet in the Canadian National Park. This Park is a natural reservation of 5,724 square miles embracing part of the Bow river valley, numerous small rivers and several towering mountain ranges. Banff National Park is the largest in the world, Canada Mountain, 8,855 feet high, looks down on Banff Springs Hotel, and the hotel looks down on the Bow river valley. Banff sits in the Park, and the Zoological Garden contains many Canadian wild animals. Banff Museum possesses many valuable objects of curiosity. In the museum there is a visitor's book in which a space is provided for remarks on Banff. Looking over the book, one is interested enough to take a note of some of the opinions on Banff. Here are a few:

"Banff is unexcelled for beauty."
 "Oh, would that my tongue could utter the thoughts that swarm in my brain."
 "Almost broke, but happy. Banff is not just the place to spend a lovely holiday. Let us be happy while we can."
 "What more can anyone desire?"
 "Cannot be beaten."
 "Beyond description."

"If I do not go to heaven when I die, I would like to go to Banff next to heaven."
 "Here one may look upon the face of God."
 Aeroplanes are employed to give visitors to Banff unusual thrills this year. They are being used in preference to aeroplanes because the lakes in the mountains offer landing and take-off stations for them, whereas such facilities are not available for the ordinary machines. The lake at Banff has been secured as the base of operations, and flights over the mountains and to other isolated lakes are projected.

The lake known as Lake Louise is a small sheet of water surrounded by mountains on all sides but one, and on this open side stands the Chateau Lake Louise looking out on the lake and the heights above. The water in Lake Louise at different periods of the day puts on the most wonderful hues of green which baffles description. Some of the mountains at Lake Louise are 8,855 feet high. Fairview Point, 11,225 feet high, Fairview Point, 9,775 feet high, Bowhead 7,435 feet. Swiss guides conduct mountain climbing parties at Lake Louise. Ponies are largely used for climbing the trails on the mountain sides. From the Chateau Lake Louise it is a nice climb to the Lakes in the

Clouds, and this climb can be easily done on foot by any athletic lady or gentleman. Among the Lakes in the Clouds one may enjoy tea in the comfortable log cabin erected for the comfort of the climbers.

There is opened to tourists this summer a new resort of rustic design in the Canadian Rockies on the sandy beaches of Lake Windermere, the loveliest warm water lake in British Columbia. Lake Windermere is situated about 175 miles south of the Main Line of the Canadian Pacific and is reached from the main line at Golden, or from Colwall on the Crow's Nest, the station being Lake Windermere.

The scenery of this region combining as it does, pastoral solitude with rugged mountain grandeur will attract visitors from all parts and become a favorite playground. The summer visitor will find here everything that he could wish, bathing, boating, riding on mountain ponies to great Caipont and glaciers, golf, automobile, fishing, a big game hunting is second.

The Canadian Pacific has a number of cabins fully equipped with every convenience of the modern home. An auto road from Banff to the course of instruction by the Dominion Park Board.

Clareholm Local News

Geo. Todd was over from Champion last week attending the fair.

J. R. Barker and family left on Saturday night last for Vancouver where they will make their home.

Mr. and Mrs. R. K. Peck and family went to Waterton Lakes the first of the week for their holidays.

E. G. Barber has a wonderful flower garden this year. His flowers were awarded a number of firsts at the fair last week.

The dance last Friday night in I. O. O. F. hall was a very successful affair. There was a large attendance and all had a good time.

A King, of Fairview Ranch, was successful in winning numerous prizes at the Stacey fair on Tuesday. He won first on Marquis sheaf wheat, first on Red Fife, and first on any other variety. He also took firsts on twenty other exhibits.

Pinned beneath a fallen tree and a huge avalanche rumbling down the mountain side, the girl is found by Pierre, who is fleeing himself. There begins a romance that provides a background for "Bullet Proof," Harry Carey's newest photodrama which will be shown at the Rex next Friday and Saturday.

Daring Train Robbery

On last Monday afternoon C. P. R. train No. 65, running from Lethbridge to Cranbrook, was held up by three armed bandits near Sentinel on the Crow's Nest line. Passengers were relieved of cash to the amount of about \$600. The police claim to know the bandits and are endeavoring to round them up. They are Austrians who have been engaged in sheep herding in that district for several years past, and knowing the country so thoroughly gives them a decided advantage over the police.

THRESHERMEN ATTENTION!

Having disposed of my threshing machine, I have for sale one cook car 10x24 feet, with stove and dishes; one bank car 8x20 feet, room for 20 men and stove (or would make a good cook car for smaller rig). Both of these cars in excellent shape with good trucks under them—the kind that don't break down. Will sell for cash or trade for stock. What have you?

E. W. White, Clareholm.

Editor Charlie Clark of the High River Times apparently has (or had) a garden. Listen to this: "During the past week this district was visited by an army of worms. They have a preference for lambquarters, but when they denosh that, they seem particularly fond of lettuce, beet tops, etc. They are a damned nuisance."

BUSINESS LOCALS

Home for sale. Apply, Mrs. Ellen Haig, Clareholm.

Wanted—Maternity work. Address Box 314, Clareholm.

Wanted—Maternity nursing. Phone 175, Clareholm. If not answered phone 129.

For Sale—A well built cottage not far from the public school. Plastered, water, light, gas. Apply F. S. Downs, Clareholm.

For Sale—Two Deering binders in good shape. One binder has a flax attachment in addition to the ordinary head. Prices right. Come and see.—E. W. White, Clareholm.

STRAYED

Strayed from Clear Lake Ranch, 8 miles north and 7 miles east of Clareholm, 1 roan cow branded three reversed G's on right ribs, with a red yearling heifer calf at side. \$5.00 reward per head will be paid for the return of same to the above ranch. E. W. White.

"Everything set for a good trip—the car running smooth as velvet—plenty of Imperial Polarine in the crankcase and more available wherever we stop. With Imperial Premier Gasoline for fuel, we'll have a most enjoyable vacation."

Imperial Polarine Available Everywhere

WHEREVER you tour, throughout the length and breadth of Canada, you can secure the grade of Imperial Polarine you now use for lubrication—exactly the same uniform grades are sold by dealers everywhere from Halifax to Vancouver.

Imperial Polarine reduces your greatest expense—depreciation, yet costs less than storage, tires, repairs or gasoline. It reduces friction to a minimum, maintains a piston-tight seal under heaviest engine heat, helps the engine extract the last ounce of power out of gasoline.

Imperial Polarine holds its body, maintains compression—keeps the motor running smoothly and quietly. The Imperial Chart of Recommendations shows the grade recommended for your car. Ask to see it when you stop for oil.

Imperial Polarine is sold by good dealers everywhere in sealed one-gallon and four-gallon cans, half-barrels and barrels, also in 12½-gallon steel kegs, the handy size for the home garage. Buy the larger sizes to save money.

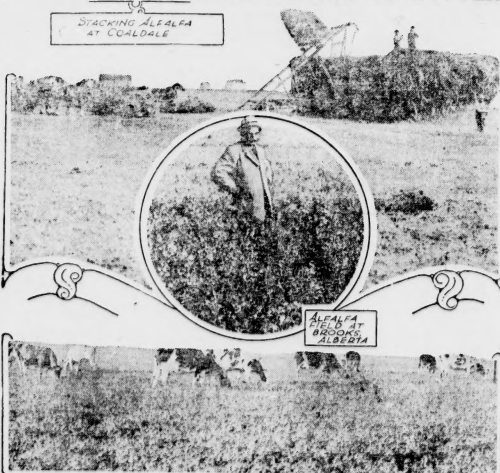

IMPERIAL POLARINE (Light medium body) IMPERIAL POLARINE HEAVY (Medium heavy body) IMPERIAL POLARINE A (Extra heavy body)

A GRADE SPECIALLY SUITED TO YOUR MOTOR

IMPERIAL OIL LIMITED
Lubrication
in all climes.

GRASSES OF CANADIAN PRAIRIES MAKE MOUNTAINS OF BUTTER

Alberta's 1920 contribution to the butter market was a fair sized lump weighing in and worth a million pounds that put \$5,125,000 into the butter-makers' pockets. The quality of this butter was unquestionable as attested by the fact that Alberta carried off the first three prizes for block butter at the recent National Dairy Council Exhibition held at Winnipeg. Alberta's butter output increased during the past four years almost 65% in volume and over 125% in value. There are 50 co-operative creameries in the province—all community owned and operated, and 14 privately owned and operated. In addition to these there are in the latter

vinces, following close on the heels of grain growing and stock raising. Mixed farming has been strongly advocated to Canadian farmers and they have seen its advantages. To-day it is generally practiced. If the result is disaster is not the result. There is always plenty of grazing and fodder to insure the weekly cream check for the man with a dairy herd. The progress of the dairying industry has been very much helped by the increased cultivation in irrigated territories. Alfalfa is the greatest fodder yet discovered for dairy cattle, and is bringing wonderful prosperity to districts such as Cardston and Brooks.

PROVINCE OF ALBERTA

6 PER CENT. GOLD BONDS

Help Your Province

- By purchasing bonds of the Province of Alberta.
- While securing the highest class of investment procurable you at the same time aid your Province to provide for the building of its Public Works and Telephones in the most effective way.
- Financing by the issue of bonds within the Province results in the distribution of the interest amongst our own people.
- If you encourage this idea, you help your Province to become less dependent on outside money markets.
- Interest is payable half-yearly—1st of May and 1st of November—by coupon.
- Bonds are in denominations of \$100, \$500 and \$1,000.
- Remittances should be made by marked cheque, money order, or postal note.

These Bonds may also be obtained from any recognised bond house in Alberta. Write for fuller information to Deputy Provincial Treasurer.

HON. C. R. MITCHELL,
Provincial Treasurer.

W. V. NEWSON, Deputy Provincial Treasurer,
Parliament Buildings, Edmonton, Alberta.

Attractions in the Canadian Rockies

Lake Minnewanka, near Banff, Alberta, attracts many motorists during the entire summer. They usually see the ice-boats gliding across its smooth surface. It is an ideal evening drive from Banff to this lake, and on the way it is interesting to stop at the animal enclosures where the Government has established the wild animals of the country. As the car speeds along on the trip, the sight of the bowing elk is specially attractive. In the spring the stately mother elk walks proudly about with her young, in the fall the mating note of the bull re-echoes down the open valley. Many a battle-riven is fought by the males at mating time.

The Bow River is the headquarters of the lover of water sports. Canoes, row-boats and launches are to be had any time of day. Plenty of good fishing is to be found a short distance up the river. For an ideal canoe trip there is nothing more picturesque than paddling up the Bow River to Shadow Creek, which drains the Vermilion Lakes. As the canoe glides into the mirrored waters, the swamp willows meet above the heads of the paddlers; an occasional trout darts from one shadow to another in the depths below. Little bursts of sunshine brighten the winding water-way still the canoe glides on again into unbroken sunshine and the wide sweep of the first Vermilion Lake.

The Bow River is a typical mountain stream and has its first sixty-five miles west of Banff and north of Lake Louise. Its head waters, the Bow and Hector Lakes, are fed from great ice-fields, which in the first days of warm spring, and their tribute into the river, and the turbid waters gathering strength with each mile, tear madly down the narrow confines bringing with them uprooted trees and all the debris lying within their reach. The lower of the water may contain valuable information of several beautiful and exciting canoe trips at the beach-house.

The old tote-road of construction down west of Banff is almost obsolete, and in its place the highway is rapidly completing a half-way which will link the eastern provinces with British Columbia. If the trip is made in late August or early September it is scarcely possible to find a large flock on the sunny slopes on the north side of the valley. The summer they wander back in the hills, though an occasional flock may be seen any time.

In the early spring the baby lambs trot along beside their mothers, in the fall the great herds of rams join the various groups, and among the elk and moose take place among the males—the horns crashing and bawling to be heard a long distance in the otherwise silent hills.

Crossing the Canadian Pacific

tracks of the Banff railway station. The car travels westward passing a chain of lakes (three in number) known as the Vermilion Lakes. About five miles distant a drive may be seen which marks the highway of Healey Creek; the Bow River glides in and out of view, occasionally a glimpse of the steel rails shows up; a bear, a coyote, or a deer, may appear. A picturesque range of mountains apply called "Sawtooth," are easily recognised on the right of the road and in an open stretch the first glimpse of Castle Mountain and the mountains about Louise are recognizable. Passing a game-warden's house, the road leads up, around and over the Minelake Hills—a group of hills beautifully wooded and a natural part in themselves.

Coming down the winding road among these hills a short run brings the car to a small bridge under which runs a small mountain stream. Just east of the bridge is a well-kept camping ground, the only restriction to the user of it being: "Keep your camp-fire in control." A little open fire-place leaves no excuse for doing otherwise. On the west side of the bridge is a tiny ice-house nestled securely under the shadow of the pine. Built of logs, its rustic style is in complete accord with its surroundings.

Johnson's Canyon is well worth the three-quarters of a mile stroll up its rocky trail, across rustic bridges, above the turbulent little stream which gives forth an attractive picture of every bend of its path. Leaving the canyon, a three-mile run brings you to the site of the one-time village of Castle situated at the very base of the mountain of that

name. It sprang as a mushroom in the night in the old construction days of the Canadian Pacific Railway. Went word that lead silver and copper were to be found in the old plant of the Rockies in paying quantities, and prospectors in paying quantities came on they went; the mountains refused to give up treasure; the deserted homes fell in decay. A mile beyond the site of the village the road forks, the right-hand turn leading to Lake Louise and the left-hand turn to the summit of Vermilion Pass—the last link of the trans-continental motor-road. Neither road should be missed though neither is yet absolutely finished. The left-hand road leads to Marble Canyon, at the top of the Pass. The drive and the canyon are well worth the time spent in seeing them. As far as the road is finished, under and about the shadows of Castle Mountain, it is a glorious drive. The site of the inclement camps used during the war is still visible.

In winter it is no colder at zero in the dry climate of Banff than at twenty-two above on the sea-board. In fact, one is far more uncomfortable where dampness prevails. The vicious, snappy climate of the Rockies is better than any medicine for the people of a warmer country. From the Orient, even from the nearest sea-board. Winter sports at Banff are being brought to greater perfection in every direction. Spectacles in all winter sports are coming more and more for the annual making a race with the snow, swimming in the warm sulphur pools, tobogganing, curling and hockey.
